

# VOLT® Solar Landscape Lighting Solar Kit Spotlight- VSAL-9001-25-BBZ

## Product Description

This brass spotlight is designed specifically for the VOLT® solar landscape lighting kits. Ideal for accenting small trees and bushes, statuary, and architectural features. A solid brass construction and premium-grade components with water-tight features enable this fixture to last a lifetime. A lot of lumen values in the market are not accurate and therefore are a false comparison. On a full charge, this fixture will last from 16-22 hours each night (varies with type of kit and charging) starting at 200 lumens and gradually diminishing from there. These lumen values are tested in a state of the art laboratory and are verifiably accurate. Adjustable glare guard allows for glare control and a toothless knuckle allows for precision aiming. The fixture carries a Lifetime Warranty just like all of our other brass fixtures. This brass fixture is sure to outlast any traditional solar landscape lighting systems on the market today.

## Product Dimensions

## Features & Benefits

- ▶ With a full charge, this fixture will last 16-22 hours each night starting at 200 lumens and gradually diminishing from there.
