

# VOLT® Solar Landscape Lighting Solar Kit Path & Area Light- VSPL-9001-25-BBZ

## Product Description

This brass path light is designed specifically for the VOLT® solar landscape lighting kits. Ideal for accenting paths, entryways, and/or garden beds. A solid brass construction and premium-grade components with water-tight features enable this fixture to last a lifetime. A lot of lumen values in the market are not accurate and therefore are a false comparison. On a full charge, this fixture will last from 16-22 hours each night starting at 250 lumens and gradually dim until powering off from there (varies with type of kit and charging). These lumen values are tested in a state of the art laboratory and are verifiably accurate. The fixture carries a Lifetime Warranty just like all of our other brass fixtures. This brass fixture is sure to outlast any traditional solar landscape lighting systems on the market today.

## Product Dimensions
